

# POST-SHOW REPORT 2024

## light + LED expo INDIA

Featuring intelligent lighting  
technology and applications

### SHOW PROFILE

India's premier expo on intelligent lighting and LED technology, 'Light + LED Expo India' concluded its 29<sup>th</sup> Edition with a successful turnaround of 11,211 visitors. As technology continues to thrive, lighting and LED industry is simultaneously evolving with smarter solutions generating new business opportunities.

Offering the solutions of the future, this year the expo presented a rich assortment of advanced range of lighting solutions that are energy-efficient, sensor-based, human-centric and aesthetically pleasing.

The show floor featured attractive solutions in LED components, architectural lighting, indoor-outdoor lighting, lighting fixtures and solutions for various applications. With the rising shift towards the automated solutions supported by AI and intelligent features, the expo witnessed a growth in the participation from lighting automation brands as compared to the past edition.

Various workshops and knowledge-sessions were organized on Day 1 and Day 2 in association with Illuminating Engineering Society (IES), Women in Lighting (WIL), Lighting Designers Association of India (LiDAI) and Electric Component Manufacturers' Association (ELCOMA). Overall, the show was a grand success resulting in business inquiries and high-level industry networking.

# TESTIMONIALS AND FEEDBACK

## Exhibitor Testimonial

We have been serving lighting industry for the last 15 years and we manufacture LED lenses. We have been participating at LED Expo and we have gained a lot of benefit and opportunities through this to meet new clients, all the OEMs and the industry professionals. Over the last two-days, we have received some very interesting queries. At the show, we launched five new products and people have liked them.

**Mr Sanjeev Singh, AGM Marketing, Optiks Mechatronics Pvt Ltd**

We have been in the exhibition since more than 10 years and this platform gives us a very good opportunity, particularly to our higher authority people to meet each and everyone within three days.

So, if we were supposed to go and meet everyone, we would have taken 20-30 days to connect with all of them. Hence, this platform is very good for us to reach to our customer base which is very wide.

**Mr Parag Parekh, General Manager, Kevin Electrochem**

## Visitor Testimonials

It's a very pleasant surprise. I had visited an ELCOMA event 8-10 years back and this time I am surprised that its much bigger, the venue is beautiful, the exhibits are worth watching, the

stalls have been very well done and the attendance is fantastic. I like some of the products which are futuristic. The knowledge sessions are fantastic, the group discussions have been the most wonderful. When I compare them with sessions at other expos, I think this is the next generation. Very good panelists, fruitful discussions and there's a lot of potential of this exhibition growing into a more consumer lighting-oriented show and if quality exhibitors can participate.

**Mr Sarvdeep Basur, Founder & Product Lighting Designer, Lucent Worldwide**

I am working with Sonepar India for the last 15 years. For the first time we are participating at Messe Frankfurt India show while we have been a part of the other global shows of

Messe Frankfurt. It has been wonderful and a great experience so far to be here. I think in the future exhibitions also we would like to take part. The experience was fantastic.

**Mr Jagadish Easwar, Executive Director - Telecom & IS, Sonepar India Pvt Ltd**

We are demonstrating our Colossus range of products and we are known for new technologies introduction in the Indian market. We have introduced a lot of driver range for smart and bluetooth technologies

for water proof and non-water proof range. At LED Expo we have thoroughly enjoyed launching our products and meet the manufacturers so, thanks to Messe Frankfurt and its entire team.

**Mr Kuldeep Gupta, Managing Director, Lumens Technologies**

We are importers for LED lights. The response has been very good with B2B visitor and also a few architects. We have been with LED expo since long and every year we are

upgrading our stall and our experience. We are also growing rapidly with it. So overall, the experience has been great.

**Mr Jayant Patel, Representative - Sales Head, Litex Lighting**
